

Suppose that you are designing an M-Commerce Application only for NMIMS University Students which can be applicable across all the campuses and all the schools of NMIMS. The application is about selling all the academic material which includes accessories like drawing pad, pen, assignment papers etc. It also sells a particular note for NMIMS courses, Reference Books (On rent / on purchase). You can also Assume any other academic material which is to be sold on the same application. Answer the following questions

1. Design 8-10 lines problem definition of your application stating the problem and proposed solutions (1 mark)
2. Describe innovative features on Mobile Commerce application that you would like design (any 3 unique feature with description) (3 marks)
3. Describe any 2 security features that you would like to incorporate. (2 marks)
4. Design any one 1-page UI (apart from start screen and Log in) that is suitable. (2 marks)

Please prepare word file. Convert into PDF and Name of the PDF File will be : Your first name_Roll Number.
